Other questions?

If you have any questions please contact sales@syncfusion.com, or give us a call at 1-888-9DOTNET (US only) or 1-919-481-1974.

We appreciate your business and look forward to exceeding your expectations of service.

Syncfusion, Inc.

Product suites

All studio packages include a 1-year subscription for technical support and new releases.

Essential Studio Enterprise Edition with Test Studio

Essential Studio Enterprise Edition features the fastest high-performance WPF Grid on the market, cool new Silverlight functionality, and Essential Reports—the first 100% RDL-compatible WPF report viewer. In addition to a comprehensive set of WPF and Silverlight controls, the Enterprise Studio includes all of Syncfusion’s products for all other supported platforms—Windows Forms, ASP.NET, ASP.NET MVC, as well as controls for Reporting and Business Intelligence. In addition to its rich feature set, this studio ships with TestStudio, enabling automated testing with HP Quick Test Professional.

Essential Studio User Interface Edition

Essential Studio User Interface Edition includes everything you need to build stunning user interfaces. This studio lets you quickly and easily build enterprise-class desktop and Web applications with docking managers, Office 2007-style controls, menus, business charts, Visio-like diagramming, the fastest .NET grid control on the market, and much more. You can design Web applications using over sixty AJAX-enabled controls or frameworks with complete documentation and samples. You can easily add advanced jQuery UI features to your Web Forms applications. This suite includes Essential Grid, Gauge, Tools, Chart, Diagram, Edit, HTMLUI, and Schedule. It supports Windows Forms, ASP.NET, ASP.NET MVC, WPF, and Silverlight.

Essential Studio Reporting Edition

Essential Studio Reporting Edition provides .NET components to read and write Excel, Word, and PDF documents. This suite enables your applications to be over 100 times faster than office automation. It includes Essential PDF, Essential XlsIO, Essential Grouping, Essential Calculate, Essential DocIO and Essential Reports. Essential Grouping allows users to group data, access filtered results, and prepare summary information. Essential Calculate allows adding calculation support to business objects with no user-interface dependencies. Essential PDF supports extracting

attachments from existing PDF documents. Essential Reports is a full-fledged reporting engine that is 100% RDL-compatible. It also contains Report Designer, which enables you to build reports interactively.

Essential Studio Business Intelligence Edition

With Essential Studio Business Intelligence Edition, you can easily build WPF, Silverlight, and ASP.NET Business Intelligence applications. This studio includes OLAP-aware grid, chart, client, and gauge controls. Two of the controls—PivotGrid and OLAPChart—let you visualize OLAP data from an SSAS database. These two controls build interactive reports, allowing users to drill down, drill up, and visualize summary information in meaningful ways. The BI Studio also comes with a Report Builder that provides you with a RAD environment where you can visually build reports against multidimensional data stored in SSAS databases. Easily pick the dimensions and measures you want to visualize in reports made up of our OLAP chart and grid and also specify filters and sorting criteria. Build multiple reports against a single database and configure the look and feel of a chart or grid using various customization options. Finally, publish these reports in an XML file and load them in your WPF and ASP.NET applications in just a few lines of code.
